Installed Showers

Shower Bases - Custom

A typical Onyx Collection "Custom" Shower consists of a shower base and one panel for each wall. An endless variety of custom configurations are possible from traditional designs to elaborate walk-in designs. Any design can be enhanced with wider curbs for glass block walls, ceiling panels and even specially designed components for accessibility including ramped curbs, and low profile curbs.

Curb Options

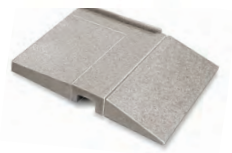

The Custom Low Profile Curb height may be as low as 1 1/2" and as tall as 2 3/4" depending on shower size. This lower curb height is good for easy access, adding a ramp, or for recessing into the floor for a curbless entry. The low profile curb has a slope back into the shower area and the shower area has a 1/4" per foot slope towards the drain.

The Custom Mid Height Curb height is 2 3/4" tall. The Mid Height is designed with a more modern, straight line look and a lower, narrower curb for easier access and to give a little more room in the shower. It also has the benefit of working well with shower doors and curtains. The shower area has a 1/4" per foot slope towards the drain.

The Custom Full Height Curb height is 4" tall. This curb height works well with both shower doors and curtains. All curbs have a slope back into the shower area and the shower area has a 1/4" per foot slope towards the drain.

The add-on ramp can be used with any low profile shower base. It can be made to any length to accomodate your custom shower design and can be removed if not needed.

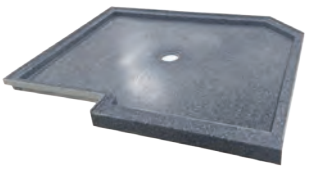

The integral ramp is a clean one piece design that makes easy access with wheel chairs. This ramp can be built into any of our custom low profile shower bases.

Shape Options

With unlimited custom shapes available, all of our custom shower bases are cast in pieces to your specifications and then chemically bonded into a single unit for easy, worry-free installation.

Shower Wall Panels

Onyx Wall Panels are available in 6 finishes: Gloss, Subway Tile, Stone Tile, 8"x24" Wavy Tile, Shiplap, and Artisan Tile. Each finish style is priced the same. Panels are approximately 3/8" thick and come standard with 2 finished edges.

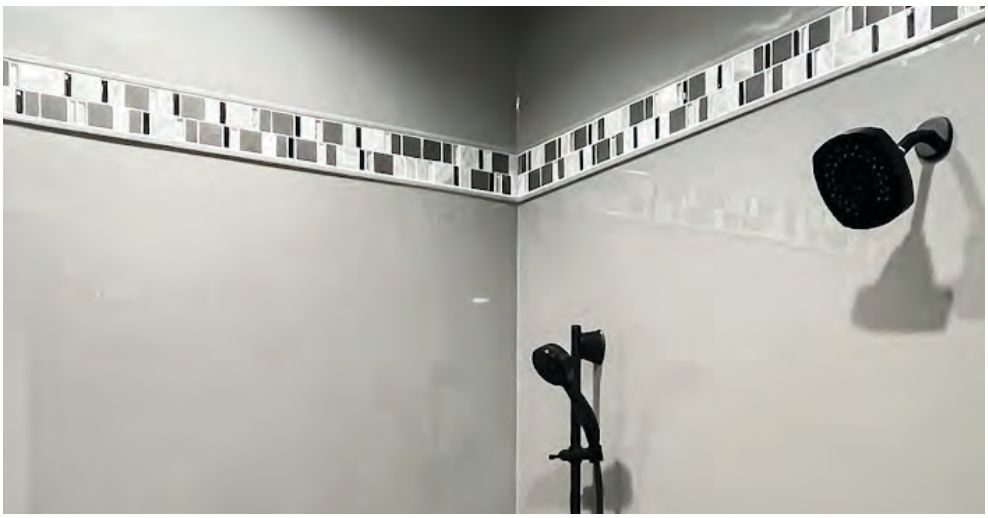

Shower kits are commonly 78", 84", 90", 96", 102" or 108" high.

Gloss

Our most popular finish, the smooth Gloss Finish gives a classic appearance with an easy to clean smooth surface.

Max Product Width: 118 1/2"
Max Product Height: 118 1/2"

Rule: Panels cannot be greater than 80" in both directions.

Subway Tile

Subway Tile Wall Panel Finish is a smooth, flat tile design with faux grout lines. The size of the "tile" is 3" x 9 5/8" and the 1/4" wide grout groove is 1/32" deep.

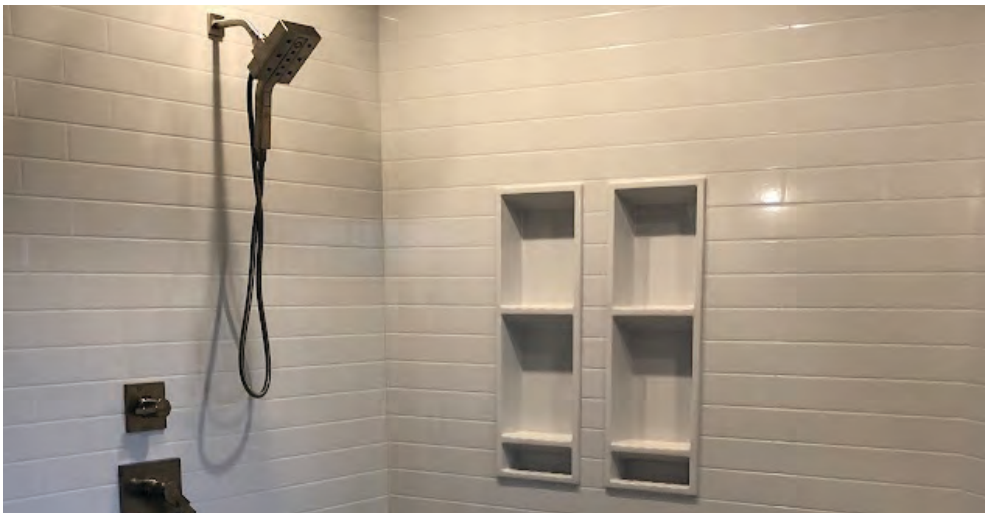

Horizontal Tile:

Max Product Width: 87 1/4"
Max Product Height: 105 3/8"

Vertical Tile:

Max Product Width: 105 3/8"
Max Product Height: 87 1/4"

Rule: Panels cannot be greater than 80" in both directions.

Stone Tile

Our production mold was made from natural 11 3/8" x 11 3/8" stone tiles which gives each wall panel the look of stone tile without the worry of leaking grout seams.

Max Product Width: 104 5/8"
Max Product Height: 104 5/8"

Rule: Panels cannot be greater than 80" in both directions.

8" x 24" Wavy Tile

Actual tile size (not including any grout lines) is 7 7/8" x 24 1/8". The grout lines are 3/16" wide.

Horizontal Tile:
Max Product Width: 96 5/8"
Max Product Height: 104 7/8"

Vertical Tile:
Max Product Width: 104 7/8"
Max Product Height: 95 5/8"

Rule: Panels cannot be greater than 80" in both directions.

Shiplap Finish

Smooth panel with 1/4" wide recessed groove. The spacing between the grooves is 5".

Horizontal Line:
Max Product Width: 96 1/8"
Max Product Height: 110"

Vertical Line:
Max Product Width: 110"
Max Product Height: 96 1/8"

Rule: Panels cannot be greater than 80" in both directions.

Artisan Tile

The Artisan Tile has 3/16" grooves to give a tile look without the worry of leaking grout seams. Integral Stripe Inlays are not available. Tile Size: 24" x 11 9/16".

Horizontal Tile:
Max Product Width: 96 3/8"
Max Product Height: 105 1/16"

Vertical Tile:
Max Product Width: 105 1/16"
Max Product Height: 96 3/8"

Rule: Panels cannot be greater than 80" in both directions.
